modern casting

the technology-for-profit magazine

1967 Editorial Index

January-December, 1967

Volumes 51-52

New Technology — Market Opportunities — Management in Action — Technology for Progress — Operations for Profit — Vendor Service — International Technology. In 1967 over 150 individual authors communicated their know-how to the metalcasting industry in more than 915 pages of MODERN CASTING feature articles.

Published by American Foundrymen's Society
Golf and Wolf Roads
Des Plaines, Ill. 60016

Jan.-Dec. 1967
Volumes 51-52

AFS CASTINGS CONGRESS

Convention Highlights, June, p. 63-71.
Highlights of 71st AFS Casting Congress, May, p. 111-130.
Technology for Progress, June, p. 73-86.

AFS REGIONALS

California Conference Presents Variety of Foundry Discussions—A. J. Iler, May, p. 75-90.
AFS Michigan Regional Puts Emphasis on Latest in Foundry Technology—G. A. Mott, G. X. Diamond, April, p. 93-100.
New England Regional Conference Features New Techniques and Know Your Competition—A. J. Wagner, December, p. 116-117.
New Look Highlights the 20th Midwest Conference—G. X. Diamond, December, p. 118-120.
AFS Northwest Regional Conference Draws 350 Foundrymen to Seattle—W. Walkins, May, p. 52-71.
Ohio Regional Conference Focuses Attention on Operating Areas—G. A. Mott, December, p. 121-122.
Penn State Biennial Foundry Conference Has Preventive Maintenance Theme—A. J. Wagner, November, p. 118-122.
Personalities Play Key Role at East Coast Regional—G. X. Diamond, November, p. 104-110.
AFS Southeastern Regional Conference Stresses Control in Operations—G. A. Mott, April, p. 96-97.
Tyler Hosts Texas Conference—J. H. Schaum, May, p. 244-246.
AFS Wisconsin Regional Conference Draws 840 Foundrymen to Milwaukee—J. H. Schaum, G. A. Mott, G. X. Diamond, April, p. 92-95.

AFS-T&RI

Tennessee Chapter Co-Sponsors T&RI Melting Course, January, p. 105.
T&RI Seminar on Gases in Metals Solves High Level Problems, January, p. 96-98.

A

AIR POLLUTION CONTROL

Air Pollution Seminar—A. J. Wagner, November, p. 84-88.
Air Pollution Study in St. Louis Area, March, p. 136-137.
Capture Dust in a Big Way, February, p. 76.
The Foundry—and Air Pollution Control Legislation—B. D. Bloomfield, October, p. 93-97.
Grabler Manufacturing Installs Unique Air Pollution Controls, July, p. 60.

ALUMINUM

Effect of Centrifugal Force on Solidification of Aluminum Alloys—A. Couture, April, p. 62-66.
Evaluation of Sand Cast Aluminum Alloy Test Bar Design—D. L. LaVelle, January, p. 64-72.
Heat Extraction by Metallic Molds During Solidification of Simple Shaped Aluminum and Its Alloy Castings—M. N. Srinivasan, M. R. Seshadri, A. Ramachandran, March, p. 93-104.
Heat Treating Aluminum Castings—R. Hise, June, p. 92-93.
Put Research to Work—G. X. Diamond, January, p. 37-40.
Standards for Aluminum Sand and Permanent Mold Castings, June, p. 97.
The Wheeldon Process—A. Woods, August, p. 61-63.

AMERICAN FOUNDRYMEN'S SOCIETY

Addition of Two Staff Members Strengthens Society Services, November, p. 178.
Air Pollution Seminar—A. J. Wagner, November, p. 84-88.
AFS Broadens Activities by Adding Two Foundrymen to Society Staff, September, p. 134.
Comments on 1966—A. B. Sinnett, January, p. 95.
Massari Retires as Technical Director, July, p. 122.
AFS Melting Methods Committee in Action, July, p. 136-137.
Record Number of Apprentices Enter 1967 AFS Competition, June, p. 158-160.
AFS Research Board Gives Approval to Two Fundamental Investigations—G. A. Mott, December, p. 110-112.
AFS Research Board Outlines Programs for Society, October, p. 126-127.
Technical Council Takes Action, November, p. 182.
24th Annual Chapter Officers Conference Stresses Liaison, August, p. 121-123.

B

BRASS, BRONZE & COPPER BASE

Effect of Thermal Gradient and Other Factors on the Properties of Copper Base Casting Alloys—J. O. Edwards, A. Couture, December, p. 91-101.
How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
Hot Tearing of Copper-Base Alloys—A. Couture, J. O. Edwards, February, p. 83-84.
Mode of Solidification of Copper-Base Alloys—J. O. Edwards, A. Couture, February, p. 85-86.
Precision High Production Metal Patternmaking—R. F. Dalton, January, p. 47-49.
Rewarding Modernization at Wm. Powell Co.—G. X. Diamond, August, p. 50-52.
Rockwell Mfg. Builds Most Modern Water Meter Foundry in World—J. H. Schaum, August, p. 53-55.

BUYERS' DIRECTORY

Buyers Directory—1968, November, p. BD1-108.

BUYING

Foundries & Suppliers to Maintain High Level in 1967, January, p. 44-46.
How to Buy a Dust Collector, September, p. 64-66.
What to Buy . . . for In-Plant Environmental Control, September, p. 67-71.

C

CASTING

The Gating and Risering of Counter-Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.

CASTING DEFECTS

Linear Contraction as a Method for Studying Surface Defects in Iron Castings—J. Pelleg, R. W. Heine, December, p. 102-108.
Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-115.
Stress Measurements of Heated Molding Sands—W. Patterson, D. Boenisch, March, p. 56-57.
Surface Color of the Mold Influences Scabbing—D. Boenisch, April, p. 53-57.

CASTINGS

Application of Ductile Iron for Civil Engineering—J. Akiyama, September, p. 112-119.
The Gating and Risering of Counter Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.
Investment Caster Expands—G. X. Diamond, August, p. 64-65.
Magnesium Casting Alloys for Aircraft Structures—M. Merrien, March, p. 60-62.
New Developments in Titanium Castings—K. J. Pulkonik, W. E. Lee, R. A. Rosenberg, April, p. 58-61.
Precision High Production Metal Patternmaking—R. F. Dalton, January, p. 47-49.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
Quality Charges Boost Foundry Yield . . . Improve Subsequent Manufacturing, June, p. 90-91.
Recent Developments in Magnesium Casting Alloys for Aircraft Structures—M. Merrien, December, p. 84-90.

CENTRIFUGAL CASTING

Effect of Centrifugal Force on Solidification of Aluminum Alloys—A. Couture, April, p. 62-66.

CHEMICAL ANALYSIS

Oxygen, Oxides, Superheating and Graphite Nucleation in Cast Iron—A. deSy, July, p. 67-78.

CLEANING & FINISHING

High Speed Grinding in Snagging Operations—D. J. Greenfield, July, p. 92-96.
Modern Castings Cleaning Equipment—J. J. Janush, R. O. Gerhardt, W. L. Olsen, Jr., February, p. 113-130.
Profit in the Cleaning Room Through the Use of Modern High Speed Abrasives—J. A. Mueller, October, p. 102-109.
Selection and Maintenance of Foundry Snagging Grinders—V. R. Lagaly, September, p. 127-129.

COMPUTERS

Computer Cures Ulcers—P. Berger, G. X. Diamond, February, p. 79-80.
Computer Pays Off for Small Foundry—J. H. Schaum, May, p. 145-147.
Computer Technology in the Foundry Industry—C. F. Knight, September, p. 89-100.
Computers Highlight ICI Session—G. X. Diamond, January, p. 126.
Digital Computer System for Foundry Control, May, p. 108.
Getting Ready for Computer Application in the Foundry—J. Westover, May, p. 133-135.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, p. 59-63.
Modern Casting Seminar Catalyzes Computer Thinking—J. H. Schaum, October, p. 72-75.
Modern Production Control in the Foundry—C. E. Fausel, May, p. 191-198.
On-Line Cupola Control with a Computer, May, p. 142-144.
Process Control on the Pouring Floor Darrell Donis, May, p. 136-138.
Programming Your Computer Needs—G. X. Diamond, May, p. 131-132.
Report on the Workshop on Quantitative Techniques—E. M. Mielnik, October, p. 67-69.
Role of the Computer in the Metalcasting Industry, May, p. 139-141.

CONSULTANTS

How to Use a Consulting Engineer—J. E. Compton, August, p. 48-49.
1967 Directory of Metalcasting and Foundry Consultants, August, p. 56-60.
Rewarding Modernization at Wm. Powell Co.—G. X. Diamond, August, p. 50-52.
Rockwell Mfg. Builds Most Modern Water Meter Foundry in World—J. H. Schaum, August, p. 53-55.

COPE & DRAG

Automated Mold Handling, January, p. 6.
Belt Grinding Steel Castings, February, p. 14.

COPPER BASE ALLOYS (See BRASS, BRONZE & COPPER BASE)

CORE BOXES

Laminated Plastic Pattern Equipment—H. S. Rogers, September, p. 120-121.
Shell Corebox Rigging, Part I—F. M. Menzel, August, p. 66.
Shell Corebox Rigging, Part II—F. M. Menzel, September, p. 84-88.

Shell Corebox Rigging, Part III—F. M. Menzel, October, p. 76.
The Wheeldon Process—A. Woods, August, p. 61-63.

CORES & COREMAKING

Central Foundry Division of General Motors Opens New Foundry—R. F. Dalton, February, p. 64-67.
Continuous Mixing for Cores & Molds (Atlantic Steel Castings, Crown Nonferrous Foundry, Kutztown Foundry)—R. F. Dalton, February, p. 69-71.
Continuous Research Essential in Meeting Tomorrow's Demands, June, p. 94-96.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, p. 59-63.
Mammoth Hot Box Core, Farmall Works, International Harvester—R. F. Dalton, February, p. 72.
New A-Z Core Technique—G. X. Diamond, October, p. 66.
New Developments in Titanium Castings—K. J. Pulkonik, W. E. Lee, R. A. Rosenberg, April, p. 58-61.
Shell or Hot Box—A Long Hard Look at Both—A. Woods, March, p. 67-69.

COSTS

Cost of Iron at the Spout—J. W. Brown, April, p. 49-50.
Electric Melting & Holding Furnaces—A View from Abroad—N. A. Birch, December, p. 50-51.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace, June, p. 99-104.
The Foundry—and Air Pollution Control Legislation—B. D. Bloomfield, October, p. 93-97.
How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
Modern Iron Melting Techniques and Their Application—J. E. Rehder, January, p. 51-58.
Selection and Maintenance of Foundry Snagging Grinders—V. R. Lagaly, September, p. 127-129.

COVER STORIES

Avalanche of Malleable Iron Castings, December, p. 138.
Beryllium Copper Sand Castings, June, p. 181.
Cast Automotive Cylinder Blocks, July, p. 3.
Expo '67 Castings, April, p. 117.
Graphite Nodule, March, p. 125.
Miniature Die Castings, February, p. 60.
National Castings Enters Its 2nd Century, October, p. 60.
Petrographic View of Rammed Sand, September, p. 3.
Precision High Production Metal Patternmaking, January, p. 47-49.
Two-Hundred and Seventeen Ton Cast Iron Ingot Mold, August, p. 120.

CUPOLA

Choosing the Right Metallic Raw Materials for Iron Foundry Melting—S. C. Clow, October, p. 88-92.
Continuous Desulfurization in a Cupola Forehearth—H. Matsumoto, Dec., p. 47.
Cupola Preheater Generates 1800-1900F Blast, July, p. 62-63.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace, June, p. 99-104.
Hot Iron—When You Need It—(Dubuque John Deere Tractor)—R. F. Dalton, February, p. 68.
Modern Iron Melting Techniques and Their Application—J. E. Rehder, Jan., p. 51-58.
The Most Common Errors in Cupola Melting—A. Dahlmann, K. Orthis, March, p. 63-66.
On-Line Cupola Control with a Computer, May, p. 142-144.

D

DEFECTS (See Casting Defect)

DESIGN

Application of Ductile Iron for Civil Engineering—J. Akiyama, Sept., p. 112-119.
Evaluation of Sand Cast Aluminum Alloy Test Bar Design—D. L. LaVelle, January, p. 64-72.
Plastic Patternmaking with Modern Materials in England—J. J. Harvey, February, p. 97-112.
Put Research to Work—G. X. Diamond, January, p. 37-40.
Standards for Aluminum Sand and Permanent Mold Castings, June, p. 97.
Thermal Analysis of Die Casting Dies—G. K. Ruhlandt, August, p. 75-79.

DIE CASTING

Die Casting Exposition and SDCE Congress, Cleveland—G. X. Diamond, January, p. 118-119.
Hot Chamber Die Casting Machines, November, p. 113-114.
How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
Put Research to Work—G. X. Diamond, January, p. 37-40.
Thermal Analysis of Die Casting Dies—G. K. Ruhlandt, August, p. 75-79.
The Thermal Fatigue of Die-Casting Dies—S. J. Noesen, H. A. Williams, June, p. 119-132.

DIE CASTINGS

Miniature Die Castings, February, p. 60.

DUCTILE (NODULAR) IRON

Application of Ductile Iron for Civil Engineering—J. Akiyama, September, p. 112-119.
Boron Contamination of Ductile Iron—R. D. Schelleng, October, p. 70-71.
Continuous Desulfurization in a Cupola Forehearth—H. Matsumoto, December, p. 47.
D. M. Converter—T. Okuro, January, p. 73-94.
D. M. Converter vs. Shaking Ladles, March, p. 72.
Desulfurizing by the CTIF-Volianik Process—M. Nicolas Volianik, March, p. 52-55.
The Effect of Cerium on Carbides in Thin Section Ductile Iron—T. K. McCluhan, December, p. 80-83.
Fatigue Strength of Alloyed Ductile Cast Iron—T. Watmough, February, p. 84-85.
Grede Modernizes Foundry, July, p. 56.
Heavy Section Ductile Iron as Affected by Certain Processing Variables—R. W. Reesman, C. R. Loper, Jr., March, p. 73-81.
Porous Plug Desulfurizing, July, p. 58-59.
Survey of Ductile Iron Treating Practice—Committee 12H, September, p. 110-111.
A Test for Determining Carbon Equivalent of Hypereutectic Cast Iron—D. C. McKissick, July, p. 82-86.

E

EDUCATION & TRAINING

The BIRP System—F. A. Wilt, S. Davis, April, p. 43-44.
Indian Institute Provides Basis for Advancement—J. Leach, March, p. 70-71.
Report on the Workshop on Quantitative Techniques—E. M. Mielnik, October, p. 67-69.
Responsibility of Management in Apprentice Training—G. Hallstrom, December, p. 76-79.
Vocational Training Project—Harry N. Drier, September, p. 56.

ENVIRONMENTAL CONTROL

Capture Air Pollutants with Spot Ventilation—A. J. Wagner, September, p. 78-79.
Chrysler's New Foundry, Criterion for Environmental Control—A. J. Wagner, September, p. 82-83.
Furnace Fume Control—G. X. Diamond, September, p. 72.
Handling Air for Comfort at Great Lakes Foundry—G. X. Diamond, September, p. 76.
How Big Should a Dust Collector Be?—G. X. Diamond, September, p. 73.
How to Buy a Dust Collector, September, p. 64-66.
A Lesson in Make-up Air—G. X. Diamond, September, p. 80.
More Light—Better Quality, July, p. 52.
Personal Air Conditioning at the Shakeout—G. X. Diamond, September, p. 80-81.
Planning a Modern Foundry Lighting System—N. Falk, September, p. 85-88.
Price Pfister Considers the Environment—A. J. Iler, September, p. 77.
Total Environmental Control . . . Air, Light, Sound—J. H. Schaum, September, p. 74-75.
What to Buy . . . for In-Plant Environmental Control, September, p. 67-71.

EXHIBIT-IN-PRINT

Exhibit-In-Print for 1967, May, Special Section. EP1-EP42.

F

FLUID FLOW

Put Research to Work—G. X. Diamond, January, p. 37-40.

FOREIGN TECHNOLOGY

Desulfurizing by the CTIF-Volianik Process—M. Nicolas Volianik, March, p. 52-55.
Indian Institute Provides Basis for Advancement—J. Leach, March, p. 70-71.
Magnesium Casting Alloys for Aircraft Structures—M. Merrien, March, p. 60-62.
The Most Common Errors in Cupola Melting—A. Dahlmann, K. Orthis, March, p. 63-66.
Shell or Hot Box—A Long Hard Look at Both—A. Woods, March, p. 67-69.
Stress Measurements of Heated Molding Sands—W. Patterson, D. Boenisch, March, p. 56-57.

FROM THE EDITOR

Are You A Wheelspinner?, October, p. 7.
Caveat Venditor . . . Let the Seller Beware, November, p. 7.
Computers . . . Today's Modern Genies, May, p. 5.
A Great Place to Work, September, p. 7.
International Measurements Mess, March, p. 5.
The Leading Edge . . . of Technology, June, p. 7.
Merry Christmas, December, p. 7.
Outlook for '67, January, p. 5.
People Problems, July, p. 7.
20th Anniversary . . . For F.E.F., April, p. 5.
We've Come a Long Way, August, p. 7.
Would You Believe?, February, p. 7.

FURAN BINDERS

Continuous Mixing for Cores & Molds (Atlantic Steel Castings, Crown Nonferrous Foundry, Kutztown Foundry)—R. F. Dalton, February, p. 69-71.
Mammoth Hot Box Core, Farmall Works, International Harvester—R. F. Dalton, February, p. 72.
Shell or Hot Box—A Long Hard Look at Both—A. Woods, March, p. 67-69.

FURNACES

Cost of Iron at the Spout—J. W. Brown, April, p. 49-50.
Heat Treating Steel . . . in Self-Generating Atmosphere Furnaces—E. J. Lenar, February, p. 77-78.
Modern Iron Melting Techniques and Their Application—J. E. Rehder, January, p. 51-58.

FURNACES, ARC

Capture Dust in a Big Way, February, p. 76.
Continuous Charged Arc Furnace At Grabler Manufacturing, July, p. 61.
Cost of Iron at the Spout—J. W. Brown, April, p. 49-50.
Electric Melting & Holding Furnaces—A View from Abroad—N. A. Birch, December, p. 50-51.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace—R. Carlson, June, p. 99-104.
Furnace Fume Control—G. X. Diamond, September, p. 72.
Grabler Manufacturing Installs Unique Air Pollution Controls, July, p. 60.

New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.

FURNACES, INDUCTION

Cost of Iron at the Spout—J. W. Brown, April, p. 49-50.
Electric Melting & Holding Furnaces—A View from Abroad—N. A. Birch, December, p. 50-51.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace—R. Carlson, June, p. 99-104.
Grede Modernizes Foundry, July, p. 56.
Hot Iron—When You Need It, John Deere Tractor Dubuque Works—R. F. Dalton, February, p. 68.
Induction Cold Melt—Permanent Mold, Midwest Machine Co.—R. F. Dalton, February, p. 75.
New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.
Save Time and Money with Packaged Induction Furnace, October, p. 56.

G

GATING

Evaluation of Sand Cast Aluminum Alloy Test Bar Design—D. L. LaVelle, January, p. 64-72.
The Gating and Risering of Counter-Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.
Put Research to Work—G. X. Diamond, January, p. 37-40.

GRAY & WHITE IRON

Choosing the Right Metallic Raw Materials for Iron Foundry Melting—S. C. Clow, October, p. 88-92.
Continuous Charged Arc Furnace at Grabler Manufacturing, July, p. 61.
The Courage to Modernize, July, p. 54-55.
Cupola Preheater Generates 1800-1900F Blast, July, p. 62-63.
Hot Iron—When You Need It, John Deere Tractor Dubuque Works—R. F. Dalton, February, p. 68.
How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
Induction Cold Melt—Permanent Mold, Midwest Machine Co.—R. F. Dalton, February, p. 75.
Influence of Vacuum Melting and Pouring on the Structure and Properties of Ni-Hard Cast Iron—J. W. Marlatt, R. W. Lindsay, September, p. 101-109.
Modern Iron Melting Techniques and Their Application—J. E. Rehder, January, p. 51-58.
New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.
Oxygen, Oxides, Superheating and Graphite Nucleation in Cast Iron—A. DeSy, July, p. 67-78.
Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
Process Control on the Pouring Floor—Darrell Donis, May, p. 136-138.
Quality Charges Boost Foundry Yield . . . Improve Subsequent Manufacturing, June, p. 90-91.
Stress Relief Equipment Castings in Minutes with Vibration, October, p. 53.
A Test for Determining Carbon Equivalent of Hypereutectic Cast Iron—D. C. McKissick, July, p. 82-86.
A Walk Through the Gardner-Denver Foundry, July, p. 64-65.

H

HEAT TRANSFER

Heat Extraction by Metallic Molds During Solidification of Simple Shaped Aluminum and Its Alloy Castings—M. N. Srinivasan, M. R. Seshadri, A. Ramachandran, March, p. 93-104.
Thermal Analysis of Die Casting Dies—G. K. Ruhlandt, August, p. 75-79.

HEAT TREATING

Aluminized Mild Steel Heat Treating and Annealing Containers, September, p. 58.
An Evaluation of Mechanical Properties of Cast Maraging Steel—J. E. Brokleff, C. S. Kortovich, February, p. 87-96.
Fatigue Strength of Alloyed Ductile Cast Iron—T. Watmough, February, p. 84-85.
Heat Treating Aluminum Castings—R. Hise, June, p. 92-93.
Heat Treating Steel . . . in Self-Generating Atmosphere Furnaces—E. J. Lenar, February, p. 77-78.
17% Nickel Cast Maraging Steel Accepted by Industry—W. A. Koppi, E. P. Sadowski, September, p. 122-126.
Stress Relief Castings in Minutes with Vibration, October, p. 53.

HIGH ALLOY CASTINGS

Directional Solidification in the Precision Casting of Gas-Turbine Parts—F. L. Ver-Snyder, R. B. Barlow, L. W. Sink, B. J. Piearcey, December, p. 68-75.
Influence of Vacuum Melting and Pouring on the Structure and Properties of Ni-Hard Cast Iron—J. W. Marlatt; R. W. Lindsay, September, p. 101-109.
17% Nickel Cast Maraging Steel Accepted by Industry—W. A. Koppi, E. P. Sadowski, September, p. 122-126.

I

INCLUSIONS, NONMETALLIC

Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-115.

INDUSTRIAL ENGINEERING

Capture Air Pollutants with Spot Ventilation—A. J. Wagner, September, p. 78-79.
Central Foundry Division of General Motors Opens New Foundry—R. F. Dalton, February, p. 64-67.
Chrysler's New Foundry, Criterion for Environmental Control—A. J. Wagner, September, p. 82-83.
Computer Cures Ulcers—P. Berger, G. X. Diamond, February, p. 79-80.
Conveyor System Key to Higher Production, Lower Costs and Upgrading of Quality, April, p. 51-52.
Handling Air for Comfort at Great Lakes Foundry—G. X. Diamond, September, p. 76.
How Big Should a Dust Collector Be?—G. X. Diamond, September, p. 73.
How to Buy a Dust Collector, September, p. 64-66.
How to Use a Consulting Engineer—J. E. Compton, August, p. 48-49.
A Lesson in Make-up Air—G. X. Diamond, September, p. 80.
Modern Casting Seminar Catalyzes Computer Thinking—J. H. Schaum, October, p. 72-75.
New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.
Planning a Modern Foundry Lighting System—N. Falk, September, p. 85-88.
Practical Production Controls for the Jobbing Foundry—C. E. Andres, October, p. 77-87.
Price Pfister Considers the Environment—A. J. Iler, September, p. 77.
Rewarding Modernization at Wm. Powell Co.—G. X. Diamond, August, p. 50-52.
Rockwell Mfg. Builds Most Modern Water Meter Foundry in World—J. H. Schaum, August, p. 53-55.
Selection and Maintenance of Foundry Snagging Grinders—V. R. Lagaly, September, p. 127-129.
Total Environmental Control . . . Air, Light, Sound—J. H. Schaum, September, p. 74-75.
What to Buy . . . for In-Plant Environmental Control, September, p. 67-71.

INOCULATION

D. M. Converter—T. Okuro, January, p. 73-94.
The Effect of Cerium on Carbides in Thin Section Ductile Iron—T. K. McCluhan, December, p. 80-83.
Oxygen, Oxides, Superheating and Graphite Nucleation in Cast Iron—A. deSy, July, p. 67-78.
Survey of Ductile Iron Treating Practice—Committee 12H, September, p. 110-111.

INTERNATIONAL FOUNDRY CONGRESS

Impressions from 34th International Foundry Congress—P. R. Gouwens, December, p. 43-44.
India Hosts 33rd IFC, March, p. 51.
International Foundry Congress Technical Review—G. X. Diamond, December, p. 45-46.
34th International Foundry Congress Scheduled for Paris, Oct. 1-6, March, p. 115.

INVESTMENT CASTING

Computers Highlight ICI Session—G. X. Diamond, January, p. 126.
Directional Solidification in the Precision Casting of Gas-Turbine Parts—F. L. Ver-Snyder, R. B. Barlow, L. W. Sink, B. J. Piearcey, December, p. 68-75.
An Evaluation of Mechanical Properties of Cast Maraging Steel—J. E. Brokleff, C. S. Kortovich, February, p. 87-96.

INVESTMENT CASTINGS

Investment Caster Expands—G. X. Diamond, August, p. 64-65.

L

LADLES

D. M. Converter vs. Shaking Ladles, March, p. 72.
Porous Plug Desulfurizing, July, p. 58-59.

M

MAGNESIUM

Effect of Microporosity on the Tensile Properties of QE22A Alloy—G. A. Fowler, March, p. 89-92.
The Gating and Risering of Counter-Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.
Magnesium Casting Alloys for Aircraft Structures—M. Merrien, March, p. 60-62.
Recent Developments in Magnesium Casting Alloys for Aircraft Structures—M. Merrien, December, p. 84-90.
Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-115.

MAINTENANCE

Computer Cures Ulcers—P. Berger, G. X. Diamond, February, p. 79-80.
Keeping Tabs on Preventive Maintenance, November, p. 82.

MALLEABLE IRON

Aluminized Mild Steel Heat Treating and Annealing Containers, September, p. 58.
Competitive Selling of Malleable—J. H. Schaum, January, p. 124-125.
Continuous Charged Arc Furnace at Grabler Manufacturing, July, p. 61.
How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
Linear Contraction as a Method for Studying Surface Defects in Iron Castings—J. Pelleg, R. W. Heine, December, p. 102-108.
Microstructure Standards for Malleable Iron—R. Cura, May, p. 199-229.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.

MANAGEMENT

Benjamin Franklin Would Have Flipped—G. X. Diamond, November, p. 124.
The BIRP System—F. A. Wile, S. Davis, April, p. 43-44.
Chrysler's New Foundry, Criterion for Environmental Control—A. J. Wagner, September, p. 82-83.
Computer Cures Ulcers—P. Berger, G. X. Diamond, February, p. 79-80.
Computer Pays Off for Small Foundry—J. H. Schaum, May, p. 145-147.
Computer Technology in the Foundry Industry—C. F. Knight, September, p. 89-100.
Cost of Iron at the Spout—J. W. Brown, April, 49-50.
The Courage to Modernize, July, p. 54-55.

First World Census of Casting Production, December, p. 48-49.
Foundries & Suppliers to Maintain High Level in 1967, January, p. 44-46.
The Foundry—and Air Pollution Control Legislation—B. D. Bloomfield, October, p. 93-97.
Getting Ready for Computer Application in the Foundry—J. Westover, May, p. 133-135.
Grede Modernizes Foundry, July, p. 56.
How to Buy a Dust Collector, September, p. 64-66.
How to Use a Consulting Engineer—J. E. Compton, August, p. 48-49.
Improved Safety Program Cuts Accident Frequency . . . Lowers Insurance Costs—C. A. Allen, June, p. 87-89.
Keeping Tabs on Preventive Maintenance, November, p. 82.
Modern Casting Seminar Catalyzes Computer Thinking—J. H. Schaum, October, p. 72-75.
Modern Production Control in the Foundry—C. E. Fausel, May, p. 191-198.
National Castings Enters Its 2nd Century—G. X. Diamond, October, p. 59-61.
A New Look in Foundry Steel Scrap: Quality Sheared Automobile Slabs—S. J. Asrael, September, p. 130-132.
Practical Production Controls for the Jobbing Foundry—C. E. Andres, October, p. 77-87.
Price Pfister Considers the Environment—A. J. Iler, September, p. 77.
Responsibility of Management in Apprentice Training—G. Hallstrom, December, p. 76-79.
Rewarding Modernization at Wm. Powell Co.—G. X. Diamond, August, p. 50-52.
Rockwell Mfg. Builds Most Modern Water Meter Foundry in World—J. H. Schaum, August, p. 53-55.
Role of the Computer in the Metalcasting Industry, May, p. 139-141.
Total Environmental Control . . . Air, Light, Sound—J. H. Schaum, September, p. 74-75.
A Walk Through the Gardner-Denver Foundry, July, p. 64-65.
What to Buy . . . for In-Plant Environmental Control, September, p. 67-71.
What is a Computer and Why?—G. X. Diamond, May, p. 131-132.
Zero in on Ross Zero Scrap Program—Bill Ross, Jr., April, 39-42.

MARAGING STEEL

An Evaluation of Mechanical Properties of Cast Maraging Steel—J. E. Brokleff, C. S. Kortovich, February, p. 87-96.

MARKETING

Application of Ductile Iron for Civil Engineering—J. Akiyama, September, p. 112-119.
Foundries & Suppliers to Maintain High Level in 1967, January, p. 44-46.

MATERIALS HANDLING

Continuous Charged Arc Furnace At Grabler Manufacturing, July, p. 61.
Continuous Mixing for Cores & Molds, Atlantic Steel Castings, Crown Nonferrous Foundry, Kutztown Foundry—R. F. Dalton, February, p. 69-71.
Conveyor System Key to Higher Production, Lower Costs and Upgrading of Quality, April, p. 51-52.
The Courage to Modernize, July, p. 54-55.
Easier Slag Disposal, July, p. 53.
Modern Castings Cleaning Equipment—J. J. Janush, R. O. Gerhardt, W. L. Olsen, Jr., February, p. 113-130.
More Sand in Nylon Buckets, June p. 183.
New Conveyor System Concept, February, p. 58.
Speed Up Job Shop Sand Handling, July, p. 66.

MECHANICAL & PHYSICAL PROPERTIES

Application of Ductile Iron for Civil Engineering—J. Akiyama, September, p. 112-119.
D. M. Converter—J. Okuro, January, p. 73-94.
Effect of Centrifugal Force on Solidification of Aluminum Alloys—A. Couture, April, p. 62-66.
Effect of Microporosity on the Tensile Properties of QE22A Alloy—G. A. Fowler, March, p. 89-92.
Effect of Thermal Gradient and Other Factors on the Properties of Copper Base Casting Alloys—J. O. Edwards, A. Couture, December, p. 91-101.
An Evaluation of Mechanical Properties of Cast Maraging Steel—J. E. Brokleff, C. S. Kortovich, February, p. 87-96.
Evaluation of Sand Cast Aluminum Alloy Test Bar Design—D. L. LaVelle, January, p. 64-72.
Fatigue Strength of Alloyed Ductile Cast Iron—T. Watmough, February, p. 84-85.
The Gating and Risering of Counter-Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.
Heavy Section Ductile Iron as Affected by Certain Processing Variables—R. W. Reesman, C. R. Loper, Jr., March, p. 73-81.
Influence of Vacuum Melting and Pouring on the Structure and Properties of Ni-Hard Cast Iron—J. W. Marlatt, R. W. Lindsay, September, p. 101-109.
Magnesium Casting Alloys for Aircraft Structures—M. Merrien, March, p. 60-62.
The Mechanics of Green Sand Molding—J. Frost, M. J. Hillier, I. Holubec, June, p. 112-118.
Recent Developments in Magnesium Casting Alloys for Aircraft Structures—M. Merrien, December, p. 84-90.
17% Nickel Cast Maraging Steel Accepted by Industry—W. A. Koppi, E. P. Sadowski, September, p. 122-126.
Solidification of Highly Undercooled Castings—T. Z. Kattamis, M. C. Flemings, July, p. 97-104.
The Thermal Fatigue of Die-Casting Dies—S. J. Noesen, H. A. Williams, June, p. 119-132.

MECHANIZATION & AUTOMATION

Automatic Sand Testing and Bond Additions to System Sand—H. W. Dietert, December, p. 61-67.
Blast-O-Matic Shakeout, July, p. 143.
Central Foundry Division of General Motors Opens New Foundry—R. F. Dalton, February, p. 64-67.
Conveyor System Key to Higher Production, Lower Costs and Upgrading of Quality, April, p. 51-52.
The Courage to Modernize, July, p. 54-55.
Easier Slag Disposal, July, p. 53.
Foundry Equipment World Market-Place, December, p. 55-58.
Grede Modernizes Foundry, July, p. 56.
Matchplate Molding Machine, March, p. 46.
Modern Castings Cleaning Equipment—J. J. Janush, R. O. Gerhard, W. L. Olsen, Jr., February, p. 113-130.
New Conveyor System Concept, February, p 58.
New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.
On-Line Cupola Control with a Computer, May, p. 142-144.
Rewarding Modernization at Wm. Powell Co.—G. X. Diamond, August, p. 50-52.
Rockwell Mfg. Builds Most Modern Water Meter Foundry in World—J. H. Schaum, August, p. 53-55.

MELTING PRACTICES

Central Foundry Division of General Motors Opens New Foundry—R. F. Dalton, February, p. 64-67.
Choosing the Right Metallic Raw Materials for Iron Foundry Melting—S. C. Clow, October, p. 88-92.
Continuous Charged Arc Furnace at Grabler Manufacturing, July, p. 61.
Continuous Desulfurization in a Cupola Forehearth—H. Matsumoto, December, p. 47.
Cost of Iron at the Spout—J. W. Brown, April, p. 49-50.
Cupola Preheater Generates 1800-1900F Blast, July, p. 62-63.
D. M. Converter—T. Okuro, January, p. 73-94.
D. M. Converter vs. Shaking Ladles, March, p. 72.
Desulfurizing by the CTIF-Volianik Process—M. Nicolas Volianik, March, p. 52-55,
Easier Slag Disposal, July, p. 53.
Electric Melting & Holding Furnaces—A View from Abroad—N. A. Birch, December, p. 50-51.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace—R. Carlson, June, p. 99-104.
Furnace Fume Control—G. X. Diamond, September, p. 72.
Hot Iron—When You Need It, John Deere Tractor Dubuque Works—R. F. Dalton, February, p. 68.
Induction Cold Melt—Permanent Mold, Midwest Machine Co.—R. F. Dalton, February, p. 75.
Influence of Vacuum Melting and Pouring on the Structure and Properties of Ni-Hard Cast Iron—J. W. Marlatt, R. W. Lindsay, September, p. 101-109.
Modern Iron Melting Techniques and Their Application—J. E. Rehder, January, p. 51-58.
The Most Common Errors in Cupola Melting—A. Dahlmann, K. Orthis, March, p. 63-66.
Oxygen, Oxides Superheating and Graphite Nucleation in Cast Iron—A. deSy, July, p. 67-78.
Porous Plug Desulfurizing, July, p. 58-59.
Processing Scrap Metal for Foundries—S. C. Massari, April, p. 45-48.
Quality Charges Boost Foundry Yield . . . Improve Subsequent Manufacturing, June, p. 90-91.
Spray Steelmaking at Millom Ironworks—A. Woods, December, p. 52-54.
Survey of Ductile Iron Treating Practice—Committee 12H, September, p. 110-111.

METALLOGRAPHY

Boron Contamination of Ductile Iron—R. D. Schelleng, October, p. 70-71.
Heavy Section Ductile Iron as Affected by Certain Processing Variables—R. W. Reesman, C. R. Loper, Jr., March, p. 73-81.
Oxygen, Oxides, Superheating and Graphite Nucleation in Cast Iron—A. deSy, July, p. 67-78.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-115.
Solidification of Highly Undercooled Castings—T. Z. Kattamis, M. C. Flemings, July, p. 97-104.

METALLURGY

Boron Contamination of Ductile Iron—R. D. Schelleng, October, p. 70-71.
Computer Pays Off for Small Foundry—J. H. Schaum, May, p. 145-147.
Continuous Charged Arc Furnace at Grabler Manufacturing, July, p. 61.
Continuous Desulfurization in a Cupola Forehearth—H. Matsumoto, December, p. 47.
Cupola Preheater Generates 1800-1900F Blast, July, p. 62-63.
D. M. Converter—T. Okuro, January, p. 73-94.
Desulfurizing by the CTIF-Volianik Process—M. Nicolas Volianik, March, p. 52-55.
The Effect of Cerium on Carbides in Thin Section Ductile Iron—T. K. McCluhan, December, p. 80-83.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace—R. Carlson, June, p. 99-104.
An Evaluation of Mechanical Properties of Cast Maraging Steel—J. E. Brokleff, C. S. Kortovich, February, p. 87-96.
Heavy Section Ductile Iron as Affected by Certain Processing Variables—R. W. Reesman, C. R. Loper, Jr., March, p. 73-81.
Magnesium Casting Alloys for Aircraft Structures—M. Merrien, March, p. 60-62.
Microstructure Standards for Malleable Iron—R. Cura, May, p. 199-229.
Mode of Solidification of Copper-Base Alloys—J. O. Edwards, A. Couture, February, p. 85-86.
The Most Common Errors in Cupola Melting—A. Dahlmann, K. Orthis, March, p. 63-66.
Oxygen, Oxides, Superheating and Graphite Nucleation in Cast Iron—A. deSy, July, p. 67-78.

Porous Plug Desulfurizing, July, p. 58-59.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
Processing Scrap Metal for Foundries—S. C. Massari, April, p. 45-48.
Quality Charges Boost Foundry Yield . . . Improve Subsequent Manufacturing, June, p. 90-91.
Recent Developments in Magnesium Casting Alloys for Aircraft Structures—M. Merrien, December, p. 84-90.
Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-115.
Solidification of Highly Undercooled Castings—T. Z. Kattamis, M. C. Flemings, July, p. 97-104.
Spray Steelmaking at Millom Ironworks—A. Woods, December, p. 52-54.
A Test for Determining Carbon Equivalent of Hypereutectic Cast Iron—D. C. McKissick, July, p. 82-86.
The Thermal Fatigue of Die-Casting Dies—S. J. Noesen, H. A. Williams, June, p. 119-132.

MODERN CASTING SEMINARS

Modern Casting Seminar Catalyzes Computer Thinking—J. H. Schaum, October, p. 72-75.

MOLD MATERIALS

New Developments in Titanium Castings—K. J. Pulkonik, W. E. Lee, R. A. Rosenberg, April, p. 58-61.
Sand Without Binder for Making Full Mold Castings—H. B. Dieter, A. J. Poali, June, p. 133-146.
Surface Color of the Mold Influences Scabbing—D. Boenisch, April, p. 53-57.
The Thermal Fatigue of Die-Casting Dies—S. J. Noesen, H. A. Williams, June, p. 119-132.

MOLDING

Central Foundry Division of General Motors Opens New Foundry—R. F. Dalton, February, p. 64-67.
Continuous Mixing for Cores & Molds, Atlantic Steel Castings, Crown Nonferrous Foundry, Kutztown Foundry—R. F. Dalton, February, p. 69-71.
Conveyor System Key to Higher Production, Lower Costs and Upgrading of Quality, April, p. 51-52.
The Courage to Modernize, July, p. 54-55.
The Eight Keys to Quality—J. S. Schumacher, August, p. 67-74.
An Exploratory Investigation of Some Bond-Water Systems—J. B. Caine, R. E. Toepke, March, p. 82-88.
Jobbing Squeezer Molding, Newquist Foundry Co.—R. F. Dalton, February, p. 74.
Matchplate Molding Machine, March, p. 46.
The Mechanics of Green Sand Molding—J. Frost, M. J. Hillier, I. Holubec, June, p. 112-118.
New Developments in Titanium Castings—K. J. Pulkonik, W. E. Lee, R. A. Rosenberg, April, p. 58-61.
New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.
Sand Without Binder for Making Full Mold Castings—H. B. Dieter, A. J. Paoli, June, p. 133-146.
Sling Molds in Jobbing Steel Foundry Atlantic Steel Castings—R. F. Dalton, February, p. 73.
Solving High Pressure Molding Sand Problems—C. E. Morrison, March, p. 58-59.
Surface Color of the Mold Influences Scabbing—D. Boenisch, April, p. 53-57.

MOLDS

The Gating and Risering of Counter-Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.
Jobbing Squeezer Molding, Newquist Foundry Co.—R. F. Dalton, February, p. 74.
New Developments in Titanium Castings—K. J. Pulkonik, W. E. Lee, R. A. Rosenberg, April, p. 58-61.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
Sling Molds in Jobbing Steel Foundry, Atlantic Steel Castings—R. F. Dalton, February, p. 73.
Solving High Pressure Molding Sand Problems—C. E. Morrison, March, p. 58-59.
Surface Color of the Mold Influences Scabbing—D. Boenisch, April, p. 53-57.

MOLYBDENUM

How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
The Thermal Fatigue of Die-Casting Dies—S. J. Noesen, H. A. Williams, June, p. 119-132.

N

NEW PRODUCT OF THE MONTH

Aluminized Mild Steel Heat Treating and Annealing Containers, September, p. 58.
Blast-O-Matic Shakeout, July, p. 143.
Digital Computer System for Foundry Control, May, p. 108.
Keeping Tabs on Preventive Maintenance, November, p. 82.
Matchplate Molding Machine, March, p. 46.
More Sand in Nylon Buckets, June, p. 183.
New Control Over the Most Important Variable in Foundry Molding Sand, December, p. 40.
New Conveyor System Concept, February, p. 58.
Save Time and Money with Packaged Induction Furnace, October, p. 56.
Stress Relief Equipment Castings in Minutes with Vibration, October, p. 53.

NODULAR (See Ductile Iron)

NOISE

Total Environmental Control . . . Air, Light, Sound—J. H. Schaum, Sept., p. 74-75.

NONDESTRUCTIVE TESTING

Foundry Slashes Testing Time with Magnetic Testing, July, p. 57.

P

PATENTS

World-Wide Patents—P. Morrison, W. Hallerberg, December, p. 59-60.

PATTERNS & PATTERNMAKING

Irradiated Wood Plastic Materials for Use in Patternmaking and Die Models—L. G. Barrett, October, p. 98-101.
Laminated Plastic Pattern Equipment—H. S. Rogers, September, p. 120-121.
More Light—Better Quality, July, p. 52.
New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.
Plastic Patternmaking with Modern Materials in England—J. J. Harvey, February, p. 97-112.
Precision High Production Metal Patternmaking—R. F. Dalton, January, p. 47-49.
Record Number of Apprentices Enter 1967 AFS Competition, June, p. 158-160.
Responsibility of Management in Apprentice Training—G. Hallstrom, December, p. 76-79.
Sand Without Binder for Making Full Mold Castings—H. B. Dieter, A. J. Paoli, June, p. 133-146.

PERMANENT MOLD CASTING

Heat Extraction by Metallic Molds During Solidification of Simple Shaped Aluminum and Its Alloy Castings—M. N. Srinivasan, M. R. Seshadri, A. Ramachandran, March, p. 93-104.
Induction Cold Melt—Permanent Mold, Midwest Machine Co.—R. F. Dalton, February, p. 75.
The Wheeldon Process—A. Woods, August, p. 61-63.

PLANT DESCRIPTION

Central Foundry Division of General Motors Opens New Foundry—R. F. Dalton, February, p. 64-67.
Tour of Mexican Foundries—J. H. Schaum, June, p. 160-161.
A Walk Through the Gardner-Denver Foundry, July, p. 64-65.

PRODUCTION CONTROL

Computer Pays Off for Small Foundry—J. H. Schaum, May, p. 145-147.
Modern Production Control in the Foundry—C. E. Fausel, May, p. 191-198.

PRODUCTS-IN-ACTION

Heat Treating Aluminum Castings—R. Hise, June, p. 92-93.
Photorama of Products-in-Action, November, p. 129-171.

Q

QUALITY CONTROL

Boron Contamination of Ductile Iron—R. D. Schelleng, October, p. 70-71.
Choosing the Right Metallic Raw Materials for Iron Foundry Melting—S. C. Clow, October, p. 88-92.
Effect of Microporosity on the Tensile Properties of QE22A Alloy—G. A. Fowler, March, p. 89-92.
Effect of Thermal Gradient and Other Factors on the Properties of Copper Base Casting Alloys—J. O. Edwards, A. Couture, December, p. 91-101.
The Eight Keys to Quality—J. S. Schumacher, August, p. 67-74.
Foundry Slashes Testing Time with Magnetic Testing, July, p. 57.
Hot Tearing of Copper-Base Alloys—A. Couture, J. O. Edwards, February, p. 83-84.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, p. 59-63.
More Light—Better Quality, July, p. 52.
Process Control on the Pouring Floor—Darrell Donis, May, p. 136-138.
Processing Scrap Metal for Foundries—S. C. Massari, April, p. 45-48.
Put Research to Work—G. X. Diamond, January, p. 37-40.
Report on the Workshop on Quantitative Techniques—E. M. Mielnik, October, p. 67-69.
Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-115.
Solving High Pressure Molding Sand Problems—C. E. Morrison, March, p. 58-59.
Surface Color of the Mold Influences Scabbing—D. Boenisch, April, p. 53-57.
A Test for Determining Carbon Equivalent of Hypereutectic Cast Iron—D. C. McKissick, July, p. 82-86.
Zero in on Ross Zero Scrap Program—Bill Ross, Jr., April, p. 39-42.

R

RADIOGRAPHS & RADIOGRAPHY

Eyect of Microporosity on the Tensile Properties of QE22A Alloy—G. A. Fowler, March, p. 89-92.
Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-115.

REFRACTORIES

Cupola Preheater Generates 1800-1900F Blast, July, p. 62-63.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace, June, p. 99-104.
Modern Iron Melting Techniques and Their Application—J. E. Rehder, January, p. 51-58.

REFRACTORY METALS

The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
The Thermal Fatigue of Die-Casting Dies—S. J. Noesen. H. A. Williams, June, p. 119-132.

RISERING

Evaluation of Sand Cast Aluminum Alloy Test Bar Design—D. L. LaVelle, January, p. 64-72.
The Gating and Risering of Counter-Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.

S

SAFETY

Improved Safety Program Cuts Accident Frequency . . . Lowers Insurance Costs—C. A. Allen, June, p. 87-89.
Profit in the Cleaning Room Through the Use of Modern High Speed Abrasives—J. A. Mueller, October, p. 102-109.

S.H.A.P. by H. J. Weber

Don't be Sucked in by a Downdraft, July, p. 10.
I Hate to Say I Told You So!, May, p. 29.
Nobody Wants You When You're Old and Gray, September, p. 10.
A Screed on Air Pollution, March, p. 10.
The U.S. Public Health Service Like Homer, Sometimes Nods, November, p. 34.
Why I Am Opposed to Birth Control, January, p. 14.

SALES

Foundries & Suppliers to Maintain High Level in 1967, January, p. 44-46.

SAND ADDITIVES & BINDERS

Continuous Research Essential in Meeting Tomorrow's Demands, June. p. 94-96.
The Eight Keys to Quality—J. S. Schumacher, August, p. 67-74.
An Electron Photomicrographic Study of Sand Grain Surfaces—D. C. Williams, G. W. Powell, K. T. Fitzpatrick, May, p. 230-238.
An Exploratory Investigation of Some Bond-Water Systems—J. B. Caine, R. E. Toepke, March, p. 82-88.
How Much Clay Is in the Sand?—J. S. Schumacher, July, p. 79-81.
Impact Testing for Green Sand Stripping Properties—J. Outhwaite, April, p. 67-84.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, 59-63.
New A-Z Core Technique—G. X. Diamond, October, p. 66.
Simplified Practical Foundry Sand Control—E. E. Woodliff, June, p. 105-111.
Solving High Pressure Molding Sand Problems—C. E. Morrison, March, p. 58-59.

SAND CONDITIONING

Automatic Sand Testing and Bond Additions to System Sand—H. Dietert, December, p. 61-67.
Continuous Mixing for Cores & Molds, Atlantic Steel Castings, Crown Nonferrous Foundry, Kutztown Foundry—R. F. Dalton, February, p. 69-71.
The Eight Keys to Quality—J. S. Schumacher, August, p. 67-74.
An Exploratory Investigation of Some Bond-Water Systems—J. B. Caine, R. E. Toepke, March, p. 82-88.
How Much Clay Is in the Sand?—J. S. Schumacher, July, p. 79-81.
Impact Testing for Green Sand Stripping Properties—J. Outhwaite, April, p. 67-84.
Property Changes and Conditioning of Repeatedly Circulating Foundry System Sands—F. Hofmann, October, p. 110-124.
Solving High Pressure Molding Sand Problems—C. E. Morrison, March, p. 58-59.
Speed Up Job Shop Sand Handling, July, p. 66.

SAND PROPERTIES

The Eight Keys to Quality—J. S. Schumacher, August, p. 67-74.
An Exploratory Investigation of Some Bond-Water Systems—J. B. Caine, R. E. Toepke, March, p. 82-88.
Impact Testing for Green Sand Stripping Properties—J. Outhwaite, April, p. 67-84.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, p. 59-63.
Property Changes and Conditioning of Repeatedly Circulating Foundry System Sands—F. Hofmann, October, p. 110-124.
Simplified Practical Foundry Sand Control—E. E. Woodliff, June, p. 105-111.
Stress Measurements of Heated Molding Sands—W. Patterson, D. Boenisch, March, p. 56-57.
What Can the Foundryman do to Control the Shear Strength of Squeeze Molded Sand Mixtures?—Not Much—D. C. Williams, August, p. 80-86.

SAND TESTING

Automatic Sand Testing and Bond Additions to System Sand—H. W. Dietert, December, p. 61-67.
The Eight Keys to Quality—J. S. Schumacher, August, p. 67-74.
An Electron Photomicrographic Study of Sand Grain Surfaces—D. C. Williams, G. W. Powell, K. T. Fitzpatrick, May, p. 230-238.
An Exploratory Investigation of Some Bond-Water Systems—J. B. Caine, R. E. Toepke, March, p. 82-88.
Impact Testing for Green Sand Stripping Properties—J. Outhwaite, April, p. 67-84.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, p. 59-63.
The Mechanics of Green Sand Molding—J. Frost, M. J. Hillier, I. Holubec, June, p. 112-118.
New Control Over the Most Important Variable in Foundry Molding Sand, December, p. 40.
Property Changes and Conditioning of Repeatedly Circulating Foundry System Sands—F. Hofmann, October, p. 110-124.
Simplified Practical Foundry Sand Control—E. E. Woodliff, June, p. 105-111.
Stress Measurements of Heated Molding Sands—W. Patterson, D. Boenisch, March, p. 56-57.
What Can the Foundryman do to Control the Shear Strength of Squeeze Molded Sand Mixtures?—Not Much—D. C. Williams, August, p. 80-86.

SCABBING

Surface Color of the Mold Influences Scabbing—D. Boenisch, April, p. 53-57.

SCRAP

Choosing the Right Metallic Raw Materials for Iron Foundry Melting—S. C. Clow, October, p. 88-92.
A New Look in Foundry Steel Scrap: Quality Sheared Automobile Slabs—S. J. Asrael, September, p. 130-132.
Processing Scrap Metal for Foundries—S. C. Massari, April, p. 45-48.

SHAKEOUT

Blast-O-Matic Shakeout, July, p. 143.
How Big Should a Dust Collector Be?—G. X. Diamond, September, p. 73.
Personal Air Conditioning at the Shakeout—G. X. Diamond, September, p. 80.

SHELL CORES

Japan's Precision Casting Industry—T. Mishima, March, p. 48.
Shell Corebox Rigging, Part I—F. M. Menzel, August, p. 66.
Shell Corebox Rigging, Part II—F. M. Menzel, September, p. 84-88.
Shell Corebox Rigging, Part III—F. M. Menzel, October, p. 76.
Shell or Hot Box—A Long Hard Look at Both—A. Woods, March, p. 67-69.

SHELL MOLDS

Japan's Precision Casting Industry—T. Mishima, March, p. 48.

SOLIDIFICATION

Directional Solidification in the Precision Casting of Gas-Turbine Parts—F. L. VerSnyder, R. B. Barlow, L. W. Sink, B. J. Piearcey, December, p. 68-75.
Effect of Centrifugal Force on Solidification of Aluminum Alloys—A. Couture, April, p. 62-66.
Effect of Thermal Gradient and Other Factors on the Properties of Copper Base Casting Alloys—J. O. Edwards, A. Couture, December, p. 91-101.
Heat Extraction by Metallic Molds During Solidification of Simple Shaped Aluminum and Its Alloy Castings—M. N. Srinivasan, M. R. Seshadri, A. Ramachandran, March, p. 93-104.
Hot Tearing of Copper-Base Alloys—A. Couture, J. O. Edwards, February, p. 83-84.
Linear Contraction as a Method for Studying Surface Defects in Iron Castings—J. Pelleg, R. W. Heine, December, p. 102-108.
Mode of Solidification of Copper-Base Alloys—J. O. Edwards, A. Couture, February, p. 85-86.
Put Research to Work—G. X. Diamond, January, p. 37-40.
Solidification of Highly Undercooled Castings—T. Z. Kattamis, M. C. Flemings, July, p. 97-104.

STEEL

Capture Dust in a Big Way, February, p. 76.
Conveyor System Key to Higher Production, Lower Costs and Upgrading of Quality, April, p. 51-52.
Foundry Slashes Testing Time with Magnetic Testing, July, p. 57.
Heat Treating Steel . . . in Self-Generating Atmosphere Furnaces—E. J. Lenar, February, p. 77-78.
How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
17% Nickel Cast Maraging Steel Accepted by Industry—W. A. Koppi, E. P. Sadowski, September, p. 122-126.
Solidification of Highly Undercooled Castings—T. Z. Kattamis, M. C. Flemings, July, p. 97-104.
Spray Steelmaking at Millom Ironworks—A. Woods, December, p. 52-54.
Stress Relief Equipment Castings in Minutes with Vibration, October, p. 53.

SUBVERSIVE ELEMENTS

Choosing the Right Metallic Raw Materials for Iron Foundry Melting—S. C. Clow, October, p. 88-92.
Processing Scrap Metal for Foundries—S. C. Massari, April, p. 45-48.

T

TESTING

Effect of Microporosity on the Tensile Properties of QE22A Alloy—G. A. Fowler, March, p. 89-92.
Evaluation of Sand Cast Aluminum Alloy Test Bar Design—D. L. LaVelle, January, p. 64-72.
Fatigue Strength of Alloyed Ductile Cast Iron—T. Watmough, February, p. 84-85.
Hot Tearing of Copper-Base Alloys—A. Couture, J. O. Edwards, February, p. 83-84.
How Much Clay Is in the Sand?—J. S. Schumacher, July, p. 79-81.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, p. 59-63.
Mode of Solidification of Copper-Base Alloys—J. O. Edwards, A. Couture, February, p. 85-86.
A Test for Determining Carbon Equivalent of Hypereutectic Cast Iron—D. C. McKissick, July, p. 82-86.
The Thermal Fatigue of Die-Casting Dies—S. J. Noesen, H. A. Williams, June, p. 119-132.

TITANIUM

New Developments in Titanium Castings—K. J. Pulkonik, W. E. Lee, R. A. Rosenberg, April, p. 58-61.

TRADE ASSOCIATIONS

Competitive Selling of Malleable—J. H. Schaum, January, p. 124-125.
Computers Highlight ICI Session—G. X. Diamond, January, p. 126.
Die Cast Textures Highlight ADCI Show—G. X. Diamond, August, p. 43.
Die Casting Exposition and SDCE Congress, Cleveland—G. X. Diamond, January, p. 118-119.
DIS Meets in Atlantic City—J. H. Schaum, August, p. 36-37.
Ductile Iron Society Goes South—J. H. Schaum, March, p. 130-131.
Ductile Iron Society Holds Top-Notch Quarterly Meeting—A. J. Wagner, November, p. 90-96.

Ductile Iron Society Holds 28th Annual Quarterly Meeting—G. X. Diamond, June, p. 174-175.
FEF on 20th Anniversary Reviews and Looks into Industry Future, June, p. 154-155.
49th Annual Meeting for FEMA—J. H. Schaum, December, p. 134.
GDIFS Annual Meeting—J. O. Schaum, December, p. 132-133.
Gray Iron Founders Meet at Ann Arbor, March, p. 129.
MR&DF Reviews Research—J. H. Schaum, April, p. 109.
Malleable Founders Optimistic—J. H. Schaum, July, p. 138.
Malleable Founders Technical and Operating Conference—G. X. Diamond, May, p. 91-96.
NAPM Announces Insurance Plan—J. H. Schaum, July, p. 134-135.
NFA Speakers Outline Complexities Facing Today's Top Management—J. H. Schaum, November, p. 204-205.
NFFS Meets at Greenbrier—J. H. Schaum, December, p. 133-134.
Research Progress Bowls Over Die Casters at Annual ADCI Meeting—G. X. Diamond, November, p. 98-100.
Seventh Annual Conference of Gray and Ductile Iron Founders Society—G. X. Diamond, May, p. 98-104.
SFSA Meeting Stresses—Manpower . . . Management . . . Motivation—J. H. Schaum, May, p. 257-258.
SFSA Stresses M-B-O—J. H. Schaum, November, p. 206-207.

TRENDS IN EDUCATION by R. E. Betterley

Cocktail Party for Learning, December, p. 22.
Education TNT—Terminology Needs Teaching, October, p. 14.
How's Your Welcome Mat?, August, p. 11.
Instruction or Buried Treasure—Which?, February, p. 24.

TRENDS PANEL REPORTS

Foundries & Supplies To Maintain High Level in 1967, Jan., p. 44-46.
Role of the Computer in the Metalcasting Industry, May, p. 139-141.

V

VENDOR SERVICE LABS.

Continuous Research Essential in Meeting Tomorrow's Demands, June, p. 94-96.

W

WELDING

17% Nickel Cast Maraging Steel Accepted by Industry—W. A. Koppi, E. P. Sadowski, September, p. 122-126.

Z

ZINC

Put Research to Work—G. X. Diamond, January, p. 37-40.

EXACT TITLES OF FEATURE ARTICLES

A

Air Force Materials Laboratory Holds Metalworking Symposium—A. J. Iler, March, p. 119.
Air Pollution Seminar Held At AFS Foundry Technical Center—A. J. Wagner, November, p. 84-88.
Aluminized Mild Steel Heat Treating and Annealing Containers, September, p. 58.
AFS Michigan Regional Puts Emphasis on Latest Foundry Technology—G. A. Mott, G. X. Diamond, April, p. 98-100.
AFS Northwest Regional Conference Draws 350 Foundrymen to Seattle—B. Walkins, May, p. 52-71.
AFS Southeastern Regional Conference Stresses Control in Operations—G. A. Mott, April, p. 96-97.
AFS Technical Groups Makes Plans, November, p. 183.
AFS Wisconsin Regional Conference Draws 840 Foundrymen to Wisconsin—J. H. Schaum, G. A. Mott, G. X. Diamond, April, p. 92-95.
ASM Exposition, January, p. 120-123.
Application of Ductile Iron for Civil Engineering—J. Akiyama, September, p. 112-119.
Automatic Sand Testing and Bond Additions to System Sand—H. W. Dietert, December, p. 61-67.
Avalanche of Malleable Iron Castings, December, p. 138.

B

Benjamin Franklin Would Have Flipped—G. X. Diamond, November, p. 124.
The BIRP System—F. A. Wile, S. Davis, April, p. 43-44.
Blast-O-Matic Shakeout, July, p. 143.
Boron Contamination of Ductile Iron—R. D. Schelling, October, p. 70-71.
Buyers Directory—108 pages of product classifications provided by 1700 suppliers to the metalcastings industry under more than 1150 subject headings and cross-references—on green pages, November, BD1-108.

C

California Conference Presents Variety of Foundry Discussions—A. J. Iler, May, p. 75-90.
Capture Dust in a Big Way, February, p. 76.
Casting Congress Plant Tours & Ladies Program, May, p. 130.
Capture Air Pollutants with Spot Ventilation—A. J. Wagner, September, p. 78-79.
Central Foundry Division of General Motors Opens New Foundry, February, p. 64-67.
Choosing the Right Metallic Raw Materials for Iron Foundry Melting—S. C. Clow, October, p. 88-92.
Chrysler's New Foundry Criterion for Environmental Control—A. J. Wagner, September, p. 82-83.
Competitive Selling of Malleable—J. H. Schaum, January, p. 124-125.
Computer Cures Ulcers—P. Berger, G. X. Diamond, February, p. 79-80.
Computer Pays Off for Small Foundry—J. H. Schaum, May, p. 145-147.
Computer Technology in the Foundry Industry—C. F. Knight, September, p. 89-100.
Computers Highlight ICI Session—G. X. Diamond, January, p. 126-127.
Congress Highlights, June, p. 63-71.
Continuous Charged Arc Furnace at Grabler Mfg., July, p. 61.
Continuous Desulfurization in Cupola Fore-Hearth—H. Matsumoto, December, p. 47.
Continuous Mixing for Cores and Molds, February, p. 69-71.
Continuous Research Essential in Meeting Tomorrow's Demands, June, p. 94-96.
Conveyor System Key to Higher Production, Lower Costs and Upgrading of Quality, April, p. 51-52.
Cost of Iron at the Spout—J. W. Brown, April, p. 49-50.
The Courage to Modernize, July, p. 54.
Cupola Preheater Generates 1800-1900F Blast, July, p. 62-63.

D

D. M. Converter—T. Okuro, January, p. 73-94.
D. M. Converter vs. Shaking Ladles, March, p. 72.
Desulfurizing by the CTIF-Volianik Process—M. Nicolas Volianik, March, p. 52-55.
Diecast Textures Highlight ADCI Show—G. X. Diamond, August, p. 43-47.
Digital Computer System for Foundry Control, May, p. 108.
Directional Solidification in the Precision Casting of Gas-Turbine Parts—F. L. VerSnyder, R. B. Barrow, L. W. Sink, B. J. Piearcey, December, p. 68-75.
DIS Meets in Atlantic City—J. H. Schaum, August, p. 36-37.
Ductile Iron Society Goes South—J. H. Schaum, March, p. 130-131.
Ductile Iron Society Holds Top-Notch Quarterly Meeting—A. J. Wagner, November, p. 90-96.

E

Easier Slag Disposal, July, p. 53.
Easy Way to Learn Gating, April, p. 14.
Effect of Centrifugal Force on Solidification of Aluminum Alloys—A. Couture, April, p. 62-66.
The Effect of Cerium on Carbides in Thin Section Ductile Iron—T. K. McCluhan, December, p. 80-83.
Effect of Microporosity on the Tensile Properties of QE22A Alloy—G. A. Fowler, March, p. 89-92.
Effect of Thermal Gradient and Other Factors on the Properties of Copper Base Casting Alloys—J. O. Edwards, A. Couture, December, p. 91-101.
The Eight Keys to Quality—J. S. Schumacher, August, p. 67-74.
Electric Melting & Holding Furnaces—A View from Abroad—N. A. Birch, December, p. 50-51.
An Electron Photomicrographic Study of Sand Grain Surfaces—D. C. Williams, G. W. Powell, K. T. Fitzpatrick, May, p. 230-238.
Evaluation of Cast Iron Melting in the Cupola, Arc Furnace and Induction Furnace (1967 Charles Edgar Hoyt Memorial Lecture)—R. Carlson, June, p. 99-104.
An Evaluation of Mechanical Properties of Cast Maraging Steel—J. E. Brokleff, C. S. Kortovich, February, p. 87-96.
Evaluation of Sand Cast Aluminum Alloy Test Bar Design—D. L. LaVelle, January, p. 64-72.
Exhibit-In-Print, May, Special Section. EP1-EP42.
An Exploratory Investigation of Some Bond-Water Systems—J. B. Caine, R. E. Toepke, March, p. 82-88.

F

Federal Government Holds Hearings on Air Pollution Control, July, p. 42.
First World Census of Casting Production, December, p. 48-49.
49th Annual Meeting for FEMA—J. H. Schaum, December, p. 134.
Foundries & Suppliers to Maintain High Level in 1967, January, p. 44-46.
The Foundry—and Air Pollution Control Legislation—B. D. Bloomfield, October, p. 93-97.
Foundry Equipment World Marketplace, December, p. 55-58.
Foundry Slashes Testing Time with Magnetic Testing, July, p. 57.
Furnace Fume Control—G. X. Diamond, September, p. 72.

G

Gallery of Awards, May, p. 128-129.
The Gating and Risering of Counter-Gravity Poured Magnesium-Lithium Castings—A. Saia, R. E. Edelman, H. L. Gilmore, July, p. 105-114.
GDIFS Annual Meeting—J. H. Schaum, December, p. 132-133.
Getting Ready for Computer Application in the Foundry—J. Westover, May, p. 133-135.
Grabler Manufacturing Installs Unique Air Pollution Controls, July, p. 60.
Grede Modernizes Foundry, July, p. 56.

H

Handling Air for Comfort at Great Lakes Foundry—G. X. Diamond, September, p. 76.
Heat Extraction by Metallic Molds During Solidification of Simple Shaped Aluminum and Its Alloy Castings—M. N. Srinivasan, M. R. Seshadri, A. Ramachandran, March, p. 93-104.
Heat Treating Aluminum Castings—R. Hise, June, p. 92-93.
Heat Treating Steel . . . in Self-Generating Atmosphere Operations—E. J. Lenar, February, p. 77-78.
Heavy Section Ductile Iron as Affected by Certain Processing Variables—R. W. Reesman, C. R. Loper, Jr., March, p. 73-81.
High Speed Grinding in Snagging Operation—D. J. Greenfield, July, p. 92-96.
Highlights on Italian Conference: Casting of Copper and its Alloys, October, p. 50.
Highlights of 71st AFS Casting Congress, May, p. 111-112.

Hot Iron—When You Need It, February, p. 68.
How Big Should A Dust Collector Be?—G. X. Diamond, September, p. 73.
How to Buy A Dust Collector, September, p. 64-66.
How to Get Started Die Casting—G. X. Diamond, October, p. 62-65.
How Much Clay Is in the Sand?—J. S. Schumacher, July, p. 79-81.
How to Use a Consulting Engineer—J. E. Compton, August, p. 48-49.

I

Impact Testing for Green Sand Stripping Properties—J. Outhwaite, April, p. 67-84.
Impressions from 34th International Foundry Congress—P. R. Gouwens, December, p. 43-44.
Improve Your Core Mixtures with a Computer—T. J. Smith, R. J. Handwerk, J. A. Conrady, J. Fitzpatrick, January, p. 59-63.
Improved Safety Program Cuts Accident Frequency . . . Lowers Insurance Costs—C. A. Allen, June, p. 87-89.
India Hosts 33rd IFC, March, p. 51.
Indian Institute Provides Basis for Advancement—J. Leach, March, p. 70-71.
Induction Cold Melt—Permanent Mold, February, p. 75.
Influence of Vacuum Melting and Pouring on the Structure and Properties of Ni-Hard Cast Iron—J. W. Marlatt, R. W. Lindsay, September, p. 101-109.
International Foundry Congress Technical Review—G. X. Diamond, December, p. 45-46.
Investment Caster Expands—G. X. Diamond, August, p. 64-65.
Irradiated Wood Plastic Materials for Use in Patternmaking & Die Models—L. G. Barrett, October, p. 98-101.

J

Japan's Precision Casting Industry—T. Mishima, March, p. 48.
Jobbing Squeezer Molding, February, p. 74.

K

Keeping Tabs on Preventive Maintenance, November, p. 82.

L

Laminated Plastic Pattern Equipment—H. S. Rogers, September, p. 120-121.
A Lesson in Make-Up Air—G. X. Diamond, September, p. 80.
Linear Contraction as a Method for Studying Surface Defects in Iron Castings—J. Pelleg, R. W. Heine, December, p. 102-108.

M

Magnesium Casting Alloys for Aircraft Structures—M. Merrien, March, p. 60-62.
Malleable Founders Optimistic—J. H. Schaum, July, p. 138.
Malleable Founders Technical & Operating Conference—G. X. Diamond, May, p. 91-96.
Mammoth Hot Box Core, February, p. 72.
Matchplate Molding Machine, March, p. 46.
The Mechanics of Green Sand Molding—J. Frost, M. J. Hillier, I. Holubec, June, p. 112-118.
Metropolitan Chapter Holds Instructors Seminar—R. E. Betterley, July, p. 39-41.
Mexican Foundry Congress & Exposition, October, p. 130-131.
Mexican Industry Luncheon, April, p. 116.
Mexico City Chapter Meets, April, p. 117.
Microstandards for Malleable Iron—R. Cura, May, p. 199-229.
Miniature Die Castings, February, p. 60.
Modern Casting Seminar Catalyzes Computer Thinking—J. H. Schaum, October, p. 72-75.
Modern Castings Cleaning Equipment—J. J. Janush, R. O. Gerhardt, W. L. Olsen, Jr., February, p. 113-130.
Modern Iron Melting Techniques and Their Application—January, p. 51-58.
Modern Production Control in the Foundry—C. E. Fausel, May, p. 191-198.
More Light—Better Quality, July, p. 52.
More Sand in Nylon Buckets, June, p. 183.
The Most Common Errors in Cupola Melting—A. Dahlmann, K. Orthis, March, p. 63-66.

N

NAPM Announces Insurance Plan—J. H. Schaum, July, p. 134.
National Castings Enters Its 2nd Century—G. X. Diamond, October, p. 59-61.
New A-Z Core Technique—G. X. Diamond, October, p. 66.
New Control Over the Most Important Variable in Foundry Molding Sands, December, p. 40.
New Conveyor System Concept, February, p. 58.
New Developments in Titanium Castings—K. J. Pulkonik, W. E. Lee, R. A. Rosenberg, April, p. 58-61.
New England Regional Features New Techniques and Know Your Competition—A. J. Wagner, December, p. 116-117.
New Foundry at Draper Corp. . . . An Achievement in Automated Flexibility—J. H. Schaum, February, p. 81-82.
A New Look in Foundry Steel Scrap: Quality Sheared Automobile Slabs—S. J. Asrael, September, p. 130-132.
New Look Highlights the 20th Midwest Conference—G. X. Diamond, December, p. 118-120.
NFA Speakers Outline Complexities Facing Today's Management—J. H. Schaum, G. A. Mott, November, p. 204-205.
NFFS Meet at Greenbrier—J. H. Schaum, December, p. 133-134.
1967 Directory of Metalcasting & Foundry Consultants, August, p. 56-60.
1967 Hoyt Memorial Lecture—R. A. Carlson, May, p. 127.
1966 Transactions Digest, February, p. 83-86.

O

Official AFS 71st Casting Congress Program, May, p. 113-119.
Ohio Regional Conference Focuses Attention on Operating Areas—G. A. Mott, December, p. 121-122.
On-Line Cupola Control with a Computer—G. X. Diamond, May, p. 142-144.
Outlook for '67—J. H. Schaum, January, p. 41-43.
Oxygen, Oxides, Superheating and Graphite Nucleation in Cast Iron—A. deSy, July, p. 67-78.

P

Penn State Biennial Foundry Conference Has Preventive Maintenance Theme—A. J. Wagner, November, p. 118-122.
Personal Air Conditioning at the Shakeout—G. X. Diamond, Sept, p. 80-81.
Personalities Play Key Role at East Coast Regional—G. X. Diamond, November, p. 104-110.
Planning A Modern Lighting System—N. Falk, September, p. 85-88.
Plastic Patternmaking with Modern Materials in England—J. J. Harvey, February, p. 97-112.
Porous Plug Desulfurizing, July, p. 58-59.
Practical Production Controls For the Jobbing Foundry—C. E. Andres, October, p. 77-87.
Precision High Production Metal Patternmaking—R. F. Dalton, January, p. 47-49.
President's Report—D. L. Hall, June, p. 72.
The Pressure Die Casting of Irons and Steels—R. L. Barto, D. T. Hurd, J. P. Stoltenberg, July, p. 87-91.
Price Pfister Considers the Environment—A. J. Iler, September, p. 77.
Process Control on the Pouring Floor—D. Donis, May, p. 136-138.
Processing Scrap Metal for Foundries—S. C. Massari, April, p. 45-48.
Products-In-Action—Annual section of over 225 pictures of equipment, materials and processes in action, November, p. 129-171.
Profit in the Cleaning Room Through Use of Modern High Speed Abrasives—J. A. Mueller, October, p. 102-109.
Programming your Computer Needs, May, p. 131.
Property Changes and Conditioning of Repeatedly Circulating Foundry System Sand—F. Hofmann, October, p. 110-124.
Put Research to Work—G. X. Diamond, January, p. 37-40.

Q

Quality Charges Boost Foundry Yield . . . Improve Subsequent Manufacturing, June, p. 90-91.

R

Recent Developments in Magnesium Casting Alloys for Aircraft Structures—M. Merrien, December, p. 84-90.
Report on the Workshop on Quantitative Techniques—E. M. Mielnik, October, p. 67-69.
Research Progress Bowls Over Die Casters at Annual ADCI Meeting—G. X. Diamond, November, p. 98-100.
Responsibility of Management in Apprentice Training—G. Hallstrom, December, p. 76-79.
Rewarding Modernization at William Powell Co.—G. X. Diamond, August, p. 50-52.
Rockwell Mfg. Builds Most Modern Water Meter Foundry in World—J. H. Schaum, August, p. 53-55.
Role of the Computer in the Metalcasting Industry, May, p. 139-141.

S

Sand Without Binder for Making Full Mold Castings—H. B. Dieter, A. J. Paoli, June, p. 133-146.
Savannah Foundry Tour, March, p. 130-131.
Save Time and Money with Packaged Induction Furnace, October, p. 56.
Segregation and Inclusions in Zirconium-Containing Magnesium Casting Alloys—B. Lagowski, August, p. 87-114.
Selection and Maintenance of Foundry Snagging Grinders—V. R. Lagaly, September, p. 127-129.
17% Nickel Cast Maraging Steel Accepted by Industry—W. A. Koppi, E. P. Sadowski, September, p. 122-126.
Seventh Annual Conference of Gray and Ductile Iron Founders' Society—G. X. Diamond, May, p. 98-104.
SFSA Meeting Stresses—Manpower Management . . . Motivation—J. H. Schaum, May, p. 257-258.
SFSA Stresses M-B-O—J. H. Schaum, November, p. 206-207.
Shell Corebox Rigging, Part I—F. M. Menzel, August, p. 66.
Shell Corebox Rigging, Part II—F. M. Menzel, September, p. 84-88.
Shell Corebox Rigging, Part III—F. M. Menzel, October, p. 76.
Shell or Hot Box—A Long Hard Look at Both—A. Woods, March, p. 67-69.
Simplified Practical Foundry Sand Control—E. E. Woodliff, June, p. 105-111.
Sling Molds in Jobbing Steel Foundry, February, p. 73.
Solidification of Highly Undercooled Castings—T. Z. Kattamis, M. C. Flemings, July, p. 97-104.
Solving High Pressure Molding Sand Problems—C. E. Morrison, March, p. 58-59.
Speed up Job Shop Sand Handling, July, p. 66.
